

EcoWC2

TOWABLE TOILET

The **EcoWC2** provides modern **ECO mobile toilet** facilities, driven by sustainable eco-friendly systems. The use of renewable solar energy and next generation Lithium cell with smart auto power management ensures **100% silent and clean green energy, resulting in running cost and CO₂ reductions**. With unlimited refills from **rainwater harvesting** for contactless hot water handwashing and non-chemical water flush toilets, the bar is set high for our standard on smart and safe wellbeing. **Water-flush ceramic toilets** and XL cubicles **optimise hygiene** and comfort with XL changing and wash facilities including 2 x hot water washbasins. **Smart Telemetry** provides user friendly power and services management to optimise efficiency and minimise fuel & carbon to zero. The **towable ECO unit** has **easy site access & setup** without requirement for HGVs or site access plans to optimise transport cost and carbon reductions. The unique, **retractable drawbar** reduces footprint onsite for **optimal HSE compliance** with a tough **anti-vandal steel** construction. Increased capacity twin WC facilities provide flexibility for more dynamic working onsite and a larger workforce.

EcoWC2

TECHNICAL SPECIFICATION

GENERAL

- / Easy towable access & setup without requirement for HGVs or site access plans
- / Instant WC facilities with hydraulic kneel-down
- / Unique retractable drawbar saves up to +60% footprint and gives optimum non-trip HSE compliance
- / Self-sufficient **hybrid solar and lithium power** with no generator for **silent, green running**
- / XL water tank with non-chemical water-flush ceramic toilets
- / Rainwater harvesting and greywater recycling reduces service intervals
- / Minimal CO₂ & noise pollution from Eco system
- / XL cubicles for separate wash and changing facilities
- / Tough, galvanised steel construction
- / Antivandal integral design and doors
- / Lifting option built into design

SMART HYBRID POWER

- / XL eco solar panel for 100% energy coverage with **silent, green running**
- / CO₂ reductions with Smart hybrid power management for silent running and fuel savings
- / High cycle Lithium battery
- / Small backup 2kW Biofuel heater & ventilation panel
- / Anti-frost system for optimal performance in colder climates
- / Fuel tank access of 20L
- / Smart Telemetry - user friendly power management to optimise efficiency and minimise fuel & genset usage

SMART TOW DESIGN

- / Easy towable access & setup
- / ULEZ, low-cost transport mitigating the requirement for HGVs and RAMs
- / Unique IP design with retractable drawbar

TWIN WC WITH UNIQUE WATER FLUSH SYSTEM

- / 2x WC with unique water flush (non-chemical) toilet for optimum hygiene
- / **Rainwater harvesting** to supplement longer service intervals by recycling precipitation - **unlimited WC & Sink** uses
- / 600L waste tank for longer service intervals of 1,200 uses
- / Running hot water on demand
- / **Rainwater harvesting** and 400L freshwater tank for longer service intervals
- / Large stainless-steel forearm wash basin & non-touch tap sensor
- / Coat hook
- / Soap & paper towel dispensers
- / Air freshener and fresh air circulation system
- / XL toilet roll holder
- / Easy clean, durable stainless-steel surfaces & non-slip chequer plate flooring
- / Energy saving automatic LED lighting

SMART ECO WATER

- / Rainwater harvesting to supplement longer service intervals by recycling precipitation
- / Non-chemical water flush system
- / XL 600L waste tank for longer service intervals
- / Minimise services, transport, carbon & costs
- / Smart Telemetry - eliminate automatic services

SMART TELEMETRY

- / Live & historical volumetric data via dashboard for your sites and projects
- / Auto system ensures optimal **silent, green running** from the Lithium/Solar hybrid power
- / Optimal utilisation to ensure proper & full usage and eliminate downtime
- / Monitor tank levels for smart services management
